

TUSHAR MARAGALE

Backend Developer • Java & Spring Boot

Maharashtra, India | +91-7028729932 | tusharmaragale@gmail.com | [linkedin.com/in/tusharmaragale](https://www.linkedin.com/in/tusharmaragale) | github.com/TusharMargale

PROFESSIONAL SUMMARY

Backend Developer with nearly 2 years of experience building scalable enterprise applications using Java, Spring Boot, Hibernate (JPA), and SQL. Skilled in RESTful API design, database optimization, and configurable workflow-driven backend systems. Adept at collaborating with cross-functional teams to deliver reliable, production-grade solutions.

WORK EXPERIENCE

Software Engineer | [Suraj Informatics Pvt. Ltd.](#)

Jun 2024 – Present • Remote

- Developed and maintained backend modules for enterprise systems (BMS, WMS, AMS, Coromandel) using Java, Spring Boot, Hibernate (JPA), and SQL.
- Designed and consumed RESTful APIs supporting large-scale business logic; implemented input validation and global exception handling to improve reliability.
- Optimized SQL queries using indexing and profiling strategies; collaborated with frontend and QA teams to define API contracts and ensure timely delivery.

PROJECTS

AMC (Annual Maintenance Contract) Management System —

Jan 2025 – Feb 2025

Java, Spring Boot, Hibernate, MySQL

- Built a backend system to manage AMC contracts using Spring Boot, Hibernate, and MySQL; designed REST APIs and DB schema for full contract lifecycle management.
- Integrated Spring Scheduler to automate email reminders for contract renewals, reducing manual follow-up effort.

Database-Driven Workflow Engine (Port Operations Module) —

2024 – 2025

Java, Spring Boot, Hibernate, MySQL

- Engineered a configurable workflow engine in Spring Boot for port operations (unloading → weighment → warehouse) where entire step sequences, transitions, and validations are database-driven — new flows onboard with zero code changes.
- Implemented step-transition validation at the API layer, returning descriptive errors for out-of-sequence actions and enforcing correct process adherence at runtime.

TECHNICAL SKILLS

Backend:	Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, RESTful APIs
Databases:	MySQL, PostgreSQL, MongoDB
Frontend:	React (Basic), Angular (Basic), JavaScript, HTML, CSS
Tools:	Git, Postman, IntelliJ IDEA, Eclipse, Spring Tool Suite (STS), DBeaver

EDUCATION

B.E. — Information Technology | [FAMT, Ratnagiri](#)

Jul 2019 – Jun 2023 • CGPA: 7.91

CERTIFICATIONS & TRAINING

Java Full Stack Development | Professional Training Program | Aug 2023 – Mar 2024

ACHIEVEMENTS

- 1st place winner at Campus-Level Hackathon 2023, competing against 100+ participants across all engineering departments.
- Recognized by Team Lead and Project Manager for outstanding backend contributions and consistent delivery on enterprise projects.
